MD. Tahsin Ferdous

Assistant Teacher — ICT Applicant

Computer Science & Software Development Background

Target Application: Assistant Teacher — ICT | Wisdom Global School, Cox's Bazar

Location: Cox's Bazar, Bangladesh
Email: tahsin.ferdous3546@gmail.com
Portfolio: tahsin-exe.vercel.app
Phone: +880 1795-368447
LinkedIn: linkedin.com/in/md-tahsin-ferdous
GitHub: github.com/Tahsin005

Professional Profile

Motivated ICT educator applicant with a strong academic foundation in Computer Science and Engineering (5 semesters completed at City University) and one year of professional software engineering experience. Possesses extensive practical expertise in computer applications, programming fundamentals, web technologies, and database management. Experienced in peer-to-peer technical mentoring and dedicated to helping secondary students build foundational digital literacy, computational thinking, and practical computing skills.

Core Computer & ICT Skills

- **General Office & Practical Computer Operations:**
  - **Microsoft Office Suite:** MS Word (drafting official correspondence, academic notices, exam question papers, reports), MS Excel (spreadsheets, student marks tabulation, data entry, basic calculations), MS PowerPoint (multimedia educational presentations, classroom slideshows).
  - **Daily ICT Operations:** English typing speed (40–50 words per minute), internet browsing and academic research, professional email communication, digital file management, printing, scanning, and practical computer hardware/software troubleshooting.
- **Programming & Computational Thinking:**
  - **Programming Languages:** Python, C++, JavaScript, Go, SQL, HTML5, CSS3.
  - **Core Concepts:** Algorithms, data structures, control flow (loops, conditionals), functions, modular code design, and logical problem solving.
- **Web Technologies & Information Systems:**
  - **Web Systems:** HTML, CSS, JavaScript, React.js, internet architecture, and web page design.
  - **Databases & Data Management:** PostgreSQL, MySQL, MongoDB, structured table design, and data organization.
- **Digital Tools, Workflows & Online Security:**
  - **Tools & Workflows:** Git, GitHub, Docker, office workflow automation, and collaborative digital tools.
  - **Digital Security Fundamentals:** Safe internet practices, account protection, password hygiene, and online system security.

Professional Work Experience

Junior Software Engineer — April 2025 – March 2026
AffPilot Technology Company (AffPilot AI) — Full-time, Onsite — *Dhaka, Bangladesh*

- Engineered and maintained core features for web-based software applications and online business systems actively used by over 1,000 customers.
- Automated repetitive operational and office workflows using Python and database scripts, reducing manual processing workload by approximately 40%.
- Integrated secure online payment and billing solutions (Stripe, SSLCOMMERZ) handling domestic and international transaction records across web platforms.
- Maintained relational databases (PostgreSQL, SQL), ensuring structured data storage, transactional integrity, and system security.
- Collaborated within an on-site cross-functional team, practicing disciplined Git and GitHub version control, peer code reviews, and structured team communication.

Education

City University, Bangladesh 2022 – 2024 | Dhaka, Bangladesh
Bachelor of Science in Computer Science and Engineering (B.Sc. in CSE) — Studies Discontinued

- **Academic Progress:** Successfully completed five semesters of undergraduate Computer Science and Engineering studies before discontinuing academic enrollment.
- **Core Coursework Completed:** Structured Programming Language (C/C++), Data Structures and Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Discrete Mathematics, and Computer Networks.

Cox's Bazar Government College Cox's Bazar, Bangladesh
Higher Secondary Certificate (HSC) — Science Session: 2019 – 2020

- Completed higher secondary education with a science curriculum, establishing strong foundations in mathematics, physical sciences, and analytical thinking.

Informal Teaching & Peer Learning

Peer Programming Guidance & Mentoring University Period
City University, Bangladesh *Dhaka, Bangladesh*

- Provided informal peer-to-peer programming assistance to a university peer learning programming, explaining fundamental programming logic, control structures, and syntax in an approachable, step-by-step manner.
- Guided hands-on debugging sessions and assisted with practical coding exercises, cultivating a strong personal interest in ICT teaching and making technical concepts clear to beginning learners.

Achievements & Co-Curricular Activities

- **ACM-ICPC Dhaka Regional Onsite Contestant (2024 & 2025):**
  - Selected for and competed in the prestigious ACM International Collegiate Programming Contest (ICPC) Dhaka Regional Onsite events in two consecutive years (2024 at Daffodil Smart City, and 2025), representing City University as part of an official competitive programming team.
  - Demonstrated advanced logical deduction, algorithmic problem solving, and collaborative thinking under time-constrained competition conditions.
- **Organizing Secretary — Competitive Programming Camp, City University:**
  - Volunteered as Organizing Secretary, helping coordinate intra-university coding contests, student training workshops, and peer practice sessions to foster algorithmic thinking among fellow students.
- **Algorithmic Problem Solving & Computational Reasoning:**
  - Actively practiced algorithmic problem solving across competitive programming platforms including Codeforces (Pupil, peak rating 1352), CodeChef (3-star, peak rating 1626), and LeetCode, developing strong analytical reasoning and computational problem-solving skills.

Practical Software Projects

Northwind — E-Commerce Web Platform Live Application | GitHub
Full-Stack Web System (React, TypeScript, PostgreSQL) *Production Deployment*

- Built a modern responsive web application featuring customer catalogs, administrative dashboards, role-based access control, and PostgreSQL database integration, showcasing real-world web architecture and data modeling.

Leet-Daemon — Distributed Code Execution Sandbox GitHub Repository
Execution Engine (Node.js, TypeScript, Docker) *Backend Architecture*

- Engineered an isolated code compilation and execution sandbox using Docker containers to safely evaluate multi-language programming code submissions within strict CPU and memory limits.
